

RICHARD WANG'OMBE MUTHUI 66319

About the Portfolio:

-I used HTML, CSS and Javascript for this project. All the code is included in the files.

Challenges:

-I had plans to include a lot of 3D animated characters into the site using three.js, but because of the tight deadline, I settled for some interesting gifs that I like just for amusement.

Link:

My portfolio is hosted publicly on github:
